

About EWING

Irrigation  Golf  Industrial

Ewing Irrigation, Golf and Industrial stands committed to water conservation. We believe in, promote, and practice the concept of proper water management. We support associations and organizations that share our commitment to water conservation education, research, and product development. Our philosophy focuses on serving as water conservation experts for landscape and irrigation professionals, who in turn, help homeowners and commercial properties understand the importance of proper water management and conservation. To assist us with this mission, we have appointed an entire sales team of Water Management Specialists.

Our longstanding commitment to educating others about water management and conservation products is evident through close partnerships with key industry manufacturers, active involvement in industry conservation initiatives, the development of a national education workshop program, and our strong support of the Irrigation Association and the Irrigation Association Education Foundation (IAEF).

“We are very excited to be part of a project that is so closely aligned with our values,” said Douglas York, President of Ewing Irrigation. “This is an amazing opportunity to educate our children about the value of managing and saving water in outdoor environments.”

Ewing is also a proud water conservation partner of the City of San Diego Water Department, and sponsor of their Annual Water Conservation Children’s Art Program aimed at promoting water conservation through children’s artwork.

Established in 1922, Ewing proudly serves as the leader in water management and conservation solutions. Ewing offers commercial and residential irrigation products, landscape and agronomic supplies, low-voltage lighting, erosion control, water features and industrial plastics to professionals serving the landscaping, turf, golf, and industrial industries. Ewing’s experts in irrigation efficiency are friendly, passionate, and prepared to serve customers with more than 165 convenient locations from coast to coast.
