A great story, with a message for both kids and adults. It raises awareness about one of our planet's biggest problems.

Trash Twisters is a fun to read story with a very real purpose. Its authors...have written a fascinating story based on the real-life problem of ocean pollution. Enjoy!

***Trash Twisters* is a Must Read!**

When two children win a family scuba adventure to a tropical island, they have no idea they will swim into a magical world with talking sea creatures and trash monsters woven into ocean garbage patches.

Written by a fifth-grade class in Santa Cruz, California, *Trash Twisters* captures gems of exploration and discovery as it spins a tale sparked with real possibilities.

Thanks to the O'Neill Sea Odyssey program and its work to protect our oceans, the WeWrite Kids learned about ocean pollution.

What happens in the ocean affects all of us.

This book is the result of "Ah Ha!" moments when the young authors became aware of a real-life problem.
